## Introduction

### General

Historically, Onan has attempted to offer replacement engines which require little or no modification to the existing, Onan-powered piece of equipment. With the large number of engine configurations and age of these applications, this task has become increasingly difficult, inefficient and, with the obsolescence of certain engine families, no longer possible. The current replacement engine program is designed to service a majority of these older models by using a limited number of standard replacement engines customized with Onan distributor or dealer installed kits. This catalog is intended to assist the distributor or dealer engine sales person in providing, if possible, end-users with a new, comparable and, in the case of older models, an improved power plant; it should be used in conjunction with other engine sales/service literature, such as the latest L-740 Price List, F-734 Engine Options & Kits, and applicable parts manuals. It is formatted similar to and supercedes all previously published replacement engine information for Onan manufactured spark ignition industrial engines.

The decision to replace the complete engine or short block/repair it should be based on the circumstances of each situation, such as engine condition, urgency for completion of repair, and cost to customer. Some advantages of replacing the engine are: 1) longer and transferable warranty, 2) fewer repairs, less maintenance and lower cost service parts, and 3) latest design improvements, including electronic ignition and emissions certification. Each engine replacement situation involves unique features which determine the alternatives from which a customer can choose. The information provided in this catalog will allow sales personnel to offer suggestions to the customer. Certain situations require that a considerable number of changes be made to the replacement engine or equipment; if the customer desires not to make these changes or a suitable replacement cannot be identified, a short block assembly can be supplied, if available.

### Engine Cross Reference Charts

Original engine model, customer, and crankshaft data are followed by a suggested replacement engine, if any, and any application notes or kits needed. Specification letters have been left off because the original and replacement engines are interchangeable at all customer interface points regardless of spec letter, unless otherwise noted. Customer information pertains to the distributor or company the original model was first sold to or the name of the OEM. The crankshaft rear PTO stub type is shown or denoted by the Sales Code (or equivalent Sales Code) for either the original and/or replacement model. In some instances the original and replacement engine PTO stubs are different; however, they are functionally interchangeable. The notes following the replacement engine model relate to the significant areas affected.

The replacement engine information provided is an estimate based on available information concerning the OEM application and how the engine was originally equipped by Onan. If the specified replacement model is shown in parentheses, this signifies that it is not a standard replacement engine but can be used for replacement purposes as long as it remains an active, current production spec. Where the original engine is a 16 or 18 HP engine (any spec) and is replaced by a 20 HP engine (e.g. specs 10893, 10933, 10940, 11253, 11254, & 11255), it might be possible in some cases and more acceptable for the customer to use a 16 or 18 HP stock engine. A situation where this won't work is if the 10933 or 10940 engine is specified and the six-hole block is required: the six-hole block feature is available only from the factory and is not on any stock Performer model.

The standard replacement engine model shown is typically not a direct or drop-in replacement. Parts from the original engine, kits, or modifications, such as electrical rewiring, or a combination, are usually required to obtain the same functional configuration as the original engine. When noted, hardware from the original engine may be used and, therefore, not all suggested kits will be required. In general, emissions certified engines are one-way interchangeable, new for old, with non-certified engines, and to maintain their certification any emissions related modification must be done with a CARB (California Air Resources Board) approved kit only.

(cont.)

## Introduction (cont.)

N/A = "not available". No replacement engines exist for the J Series, L25, LKB, NB, RCCK, or Vacu-Flo N or CCK Series engines (Note: this also generally applies to any Onan manufactured diesel industrial engine or any genset powered by an Onan manufactured engine.) For all other engine models, N/A indicates there is either no suitable Performer replacement engine or, especially for the CCK/NH models, there is usually insufficient information available and/or potential irreconcilable differences to allow a suggestion to be made. Although the latter doesn't eliminate the possibility of using a Performer engine, the specifics of each case must be analyzed to determine if replacement with the Performer is possible or practical. Unless this analysis is done, a short block is suggested, if available.

### Warranty Information

The responsibility for proper engine installation belongs to the parties involved in each specific replacement situation. The information in this catalog should be used as a guide and is not a guarantee of complete compatibility in every situation where it might be applied. Before any action is taken, all information should be reviewed with the customer for their approval, so they are able and prepared to adapt, if necessary, to the new configuration. The Onan Warranty statement lists the coverage and responsibility of both the Onan Corp and the end user. For reliability, service, and warranty reasons, parts reused from the original engine should be limited to those not normally subjected to wear or degradation. Used parts are not warrantable items and new parts, including kits, are covered under the new engine warranty only if installed by an Onan authorized representative. Only workmanship done by the factory or other Onan authorized representative is covered.

### Ordering and Service Information

Before ordering an engine for replacement purposes, always check factory inventory first for the original or actual engine model being replaced. Older OEM specs are sometimes considered excess inventory and might be specially discounted and require few, if any, modifications. When replacing an engine with another in the same family, such as the Performer, it's customary that the spec letter of the replacement engine be the same or higher than the spec letter of the original engine, unless the customer is notified and agrees otherwise.

The use of kits can be helpful when servicing parts later on. Many kits include a label such that when properly marked and affixed to the engine being modified, it can aid in ordering the correct part when the factory equipped configuration has been altered in the field.

All information, illustrations, and specifications contained in this catalog are based on the latest product information available at the time of publication. Onan reserves the right to make changes at any time without notice.

<sup>1</sup> Data is for informational purposes only. Dimensions are approximate.

<sup>2</sup> TRFB = distance from end (tip) of stub to rear face of cylinder block or, for the Vertical Performer, bottom face of oil base.

<sup>3</sup> TFS = distance from end (tip) of stub to first shoulder on stub.

<sup>4</sup> Early crankshafts had 3/8-16 threaded hole.

Notes - Replacement Engine	
Note No.	
1	USE 1.44" O.D. FRONT PTO STUB SHAFT FROM ORIGINAL ENGINE OR SUPPLY 190-0577 KIT.
2	MIGHT REQUIRE CRANKSHAFT SPACER P/N 104-1694 IF MOUNTING ELECTRIC CLUTCH.
3	USE FRONT BELT DRIVE PULLEY FROM ORIGINAL ENGINE (2.00" BLOWER WHEEL PTO PILOT DIA. ONLY) OR SUPPLY 190-0576 KIT.
4	REPLACEMENT ENGINE SUPPLIED WITHOUT OIL PRESSURE LINE. SUPPLY 541-0238 KIT IF REQUIRED.
5	REQUIRES 541-0307 PTO SPACER KIT IF POWER TAKEN FROM BLOWER WHEEL END. IF STATIONARY GUARD REQUIRED, SUPPLY 541-0369 KIT.
6	USE ELECTRIC CLUTCH ADAPTER FROM ORIGINAL ENGINE OR SUPPLY P/N 190-0597.
6.1	USE ROCKFORD CLUTCH FROM ORIGINAL ENGINE OR SUPPLY 190-0289 KIT.
7	ORIGINAL ENGINE HAD BLOWER WHEEL WITH 1.94" PTO PILOT DIA. PERFORMER BLOWER WHEEL HAS 2.00" PTO PILOT DIA. SEE APPENDIX E.2.
8	EARLY MODELS WITH SINGLE PIECE HYDRAULIC PUMP/BEARING PLATE: REQUIRES 541-0344 SAE "A" HYDRAULIC PUMP ADAPTOR KIT. LATER MODELS WITH SEPARATE HYDRAULIC PUMP ADAPTOR: REUSE ADAPTOR FROM ORIGINAL ENGINE OR SUPPLY 541-0344 KIT.
9	EARLY MODELS WITH SINGLE PIECE HYDRAULIC PUMP/BEARING PLATE: REQUIRES 541-0374 SAE "B" HYDRAULIC PUMP ADAPTOR KIT. LATER MODELS WITH SEPARATE HYDRAULIC PUMP ADAPTOR: REUSE ADAPTOR FROM ORIGINAL ENGINE OR SUPPLY 541-0374 KIT.
10	MIGHT REQUIRE 520-0820 STUD(S) FOR ACCESSORY MOUNTING TO REAR BLOCK FACE.
12	TAP FOUR (4) EXISTING 0.159 DIAMETER HOLES ON REAR BEARING PLATE WITH #10-32 UNF-2B THREAD, 0.5 MINIMUM DEEP, IF NECESSARY, FOR MOUNTING ELECTRIC CLUTCH.
13	READJUST ENGINE SPEED SETTINGS PER SALES CODE FOR SPECIFICATION NUMBER OF ORIGINAL EQUIPMENT ENGINE. SEE SERVICE MANUAL FOR ADJUSTMENT PROCEDURE.
14	ORIGINAL ENGINE HAD SPECIAL SCREW (P/N 146-0330) TO INCREASE LOW IDLE. REUSE OR INSTALL LONGER SCREW AS NEEDED.
15	REPLACEMENT ENGINE SUPPLIED WITH SIDE PULL GOVERNOR. REROUTE THROTTLE CABLE OR SUPPLY 541-0191 KIT IF FRONT PULL GOVERNOR REQUIRED.
16	ORIGINAL ENGINE HAD FIXED SPEED GOVERNOR. SUPPLY 541-0424 KIT IF REQUIRED.
17	IF NEEDED, USE REMOTE THROTTLE CABLE MOUNTING HARDWARE FROM ORIGINAL ENGINE (NO KIT AVAILABLE).
18	REPLACEMENT ENGINE SUPPLIED WITH REMOTE REAR PULL CHOKE. REROUTE CHOKE CABLE OR SUPPLY 541-0190 KIT IF FRONT PULL CHOKE REQUIRED.
19	ORIGINAL ENGINE HAD ELECTRIC CHOKE. SUPPLY 541-0412 REMOTE CHOKE KIT IF REQUIRED.
20	ORIGINAL ENGINE HAD 146-0502 FUEL CUT-OFF SOLENOID. SUPPLY BY P/N IF REQUIRED.
21	MIGHT REQUIRE TWO (2) 520-0852 INTAKE MANIFOLD STUDS.
22	ORIGINAL ENGINE HAD OUTER OIL FILL TUBE & INDICATOR. SUPPLY 541-0434 KIT. (P224)
22.1	SUPPLY 541-0301 INNER OIL FILL TUBE KIT.
23	ORIGINAL ENGINE HAD NON-STD ANGLE OIL FILL; REPLACEMENT ENGINE HAS EXTENDED. MIGHT REQUIRE 541-0434 (OUTER) OR 541-0433 (INNER) KITS. (NH SERIES)
24	ORIGINAL ENGINE HAD SPECIAL OIL FILL TUBE; MIGHT REQUIRE 541-0300 (OUTER) KIT.
25	ANGLED INSTALLATION REQUIRES DIPSTICK P/N 123-1630 (11 DEG, FRONT UP).
26	ORIGINAL ENGINE HAD NON-STANDARD OIL FILL. SEE F-734 <u>PERFORMER ENGINE OPTIONS &amp; KITS</u> .
27	ANGLED INSTALLATION REQUIRES DIPSTICK P/N 123-1404 (4 DEG, FRONT DOWN).

Note No.	
28	ORIGINAL ENGINE HAD OPTIONAL OIL FILTER; SUPPLY BY P/N IF REQUIRED.
29	USE REMOTE OIL FILTER ASSEMBLY FROM ORIGINAL ENGINE OR SUPPLY 122-0554 KIT OR INDIVIDUAL PARTS BY P/N.
30.1	ORIGINAL ENGINE HAD OPTIONAL HI CAPACITY OIL BASE SYSTEM (8.65" CRKSHFT CNTRLN HT). REUSE OR ORDER PARTS PER SALES CODE(S) FOR SPEC # OF ORIG ENG. MAJOR COMPONENTS INCL OIL BASE, PICKUP TUBE, & FILL TUBE/INDICATOR, AND BLOWER HOUSING (3 QT BASE ONLY).
31	SHIM REPLACEMENT ENGINE TO CORRECT CRANKSHAFT HEIGHT.
32	ORIGINAL ENGINE USED 193-0108 OIL PRESSURE SENDER; SUPPLY BY P/N.
33	IF ORIGINAL ENGINE HAS THREADED EXHAUST PIPE SCREWED DIRECTLY INTO CYLINDER BLOCK, SUPPLY 541-0370 THREADED EXHAUST FLANGE KIT.
34	ORIGINAL ENGINE HAD 501-0203 FLEX OIL LINE; SUPPLY BY P/N IF REQUIRED.
35	ORIGINAL ENGINE HAD OIL BASE WITH TAPPED MOUNTING FEET; MOUNT REPLACEMENT WITH STANDARD HARDWARE.
36	SUPPLY 541-0458-02 HIGH CAPACITY AIR CLEANER KIT.
36.1	ORIGINAL ENGINE HAD AIR CLEANER WITH FITTING FOR RESTRICTION INDICATOR; SUPPLY BY P/N (REF: SALES CODE 19BA).
37	USE REMOTE AIR CLEANER ADAPTER ASSEMBLY COMPONENTS FROM ORIGINAL ENGINE (T260G, PERFORMER P224G & P216/P218/P220G (BEGIN SPEC C) ENGINES ONLY) OR SUPPLY 541-0320 KIT.
38	ORIGINAL ENGINE SUPPLIED LESS AIR CLEANER; REPLACEMENT ENGINE SUPPLIED WITH AIR CLEANER. IF NECESSARY, SUPPLY 541-0320 REMOTE A/C ADAPTER AND/OR 541-0147 ELBOW KITS AND REPLUMB PIPING AS REQUIRED.
39	FOR 1-3/4" REMOTE AIR CLEANER ADAPTER SYSTEMS, SUPPLY 541-0320 ADAPTER (2") KIT AND, IF NECESSARY 541-0147 ELBOW KIT AND P/N 140-1240 HOSE ADAPTER (2.00/1.75") AND REPLUMB PIPING AS REQUIRED.
40	SUPPLY 541-0147 REMOTE AIR CLEANER ELBOW KIT IF REQUIRED.
41	ORIGINAL ENGINE HAD INTAKE MANIFOLD WITH A VACCUM TAP; MODIFY MANIFOLD AS REQUIRED.
42.1	ORIGINAL ENGINE HAD EXHAUST HEAT SHIELDS; REUSE OR SUPPLY 541-0419 KIT. (STEINER ONLY: NOT ALL PARTS IN KIT WILL BE USED.)
43	ORIGINAL ENGINE HAD FLANGE MOUNTED REAR OUTLET EXHAUST TUBES; SUPPLY 541-0257 KIT.
44	ORIGINAL ENGINE HAD 1.50" OD EXHAUST STUB ADAPTORS; SUPPLY 542-7129 KIT.
46	ORIGINAL ENGINE HAD FLANGE MOUNTED REAR OUTLET EXHAUST TUBES; SUPPLY 541-0400 KIT.
47	ORIGINAL ENGINE EXHAUST SYSTEM MIGHT NOT FIT PERFORMER ENGINE. IF NECESSARY, SEE F-734 PERFORMER ENGINE OPTIONS & KITS.
48	ORIGINAL ENGINE HAD CROSSOVER EXHAUST MANIFOLD WHICH WILL NOT FIT P224 ENGINE. MIGHT REQUIRE 542-7119 OR 542-7120 KIT.
49	ORIGINAL ENGINE HAD EXHAUST TUBES AND/OR HEAT SHIELDS. SUPPLY 541-0187 (TUBES) AND/OR 541-0188 (HEAT SHIELDS) KIT(S).
50	ORIGINAL ENGINE HAD EXHAUST TUBES AND/OR HEAT SHIELDS. SUPPLY 541-0202 (HEAT SHIELDS) AND/OR 541-0203 (TUBES) KIT(S). EXCEPTION: 541-0203 NOT APPLICABLE TO B48G/CUB CADET/IH.
51	ORIGINAL ENGINE HAD EXHAUST TUBES. SUPPLY P/N 154-2158 & 154-2159.
51.2	ORIGINAL ENGINE HAD 1.12" OD EXHAUST STUB ADAPTORS. SUPPLY 541-0234 KIT.
52	ORIGINAL ENGINE HAD 1.28" OD EXHAUST STUB ADAPTORS; SUPPLY 542-7214 KIT IF REQUIRED.

Note No.	
53	ORIGINAL ENGINE HAD CROSSOVER EXHAUST MANIFOLD. SUPPLY 542-7120 KIT.
54	SUPPLY 541-0197 CROSSOVER EXHAUST MANIFOLD KIT.
55	ORIGINAL ENGINE HAD CROSSOVER EXHAUST MANIFOLD. SUPPLY 542-7119 KIT.
56	ORIGINAL ENGINE HAD CROSSOVER EXHAUST MANIFOLD. SUPPLY 541-0200 KIT.
57	ORIGINAL ENGINE HAD CROSSOVER EXHAUST MANIFOLD. SUPPLY 541-0201 KIT.
58	SUPPLY 541-0206 REMOTE AIR CLEANER KIT; MIGHT REQUIRE NEW PIPING OR REPLUMBING FROM REMOTE A/C TO CARBURETOR. NOTE: SOME NHC SPEC A-C WILL REQUIRE CONVERSION FROM ORIG SIDE DRAFT CARB/STD A/C TO DOWN DRAFT CARB/REMOTE A/C.
59	GRAVELY MUFFLER P/N 31719 REQUIRED FOR CCKA APPLICATION; OPTIONAL FOR B SERIES.
60	ORIGINAL ENGINE HAD CYLINDER AIR HOUSINGS WITH WELD NUTS; REUSE OR SUPPLY BY P/N (REF: SALES CODE 23DK).
61	ORIGINAL ENGINE HAD STATIONARY GUARD. SUPPLY 541-0296 (WITHOUT PTO HOLE) OR 541-0369 (WITH PTO HOLE) KIT.
62	ORIGINAL ENGINE DELETED ROTATING BLOWER WHEEL SCREEN. REMOVE SCREEN <u>ONLY</u> IF COOLING AIR INLET PROTECTED OR STATIONARY GUARD USED (541-0296 (W/O PTO HOLE) OR 541-0369 (W/ PTO HOLE) KITS).
62.1	REUSE OIL BASE COOLING BAFFLE FROM ORIGINAL ENGINE OR SUPPLY BY P/N (REF: SALES CODE 23DV).
63	SUPPLY P/N 503-1396 BREATHER HOSE (TRIM LENGTH AS REQUIRED; CLAMP BOTH ENDS), P/N 517-0252-01 HOLE PLUG (INSTALL IN BLOWER HOUSING. SECURE BY BENDING TABS.), AND P/N 145-0551 REMOTE AIR CLEANER ELBOW.
64	SUPPLY 541-0259 35 AMP ALTERNATOR KIT.
65	ORIGINAL ENGINE HAD INNER OIL FILL TUBE. SUPPLY 541-0433 KIT. (P224)
66	ORIGINAL ENGINE HAD RECOIL STARTER; REPLACEMENT ENGINE SUPPLIED WITH ELECTRIC STARTER.
67	MAY REQUIRE STARTER P/N 191-1828 (INERTIA DRIVE) IF STANDARD STARTER (SOLENOID SHIFT) INTERFERES.
68	ORIGINAL ENGINE HAD 1 TERMINAL (N.O.) OR 2 TERMINAL (N.O./N.C.) LOP SWITCH; SUPPLY 541-0319 KIT. SEE SERVICE MANUAL AND INSTRUCTION SHEET E-313 FOR WIRING DIAGRAM.
69	ORIGINAL ENGINE HAD 1 TERMINAL (N.C.) LOP SWITCH; SUPPLY 541-0235 KIT (CAN BE USED TO ACTIVATE LIGHT). SEE SERVICE MANUAL AND INSTRUCTION SHEET E-313 FOR WIRING DIAGRAM.
70	ORIGINAL ENGINE HAD 2 TERMINAL (N.O.) LOP SWITCH; SUPPLY 541-0236 KIT. SEE SERVICE MANUAL AND INSTRUCTION SHEET E-313 FOR WIRING DIAGRAM.
71	ORIGINAL ENGINE HAD 4 PIN CONNECTOR WIRING. SEE SERVICE MANUAL AND INSTRUCTION SHEET E-313 FOR WIRING DIAGRAM.
71.1	ORIGINAL ENGINE HAD 9 PIN CONNECTOR WIRING HARNESS. SEE SERVICE MANUAL, INSTRUCTION SHEET E-313, AND OEM INFO FOR WIRING DIAGRAM, OR SUPPLY BY P/N.
71.2	ORIGINAL ENGINE HAD 6 PIN CONNECTOR WIRING. SEE SERVICE MANUAL AND INSTRUCTION SHEET E-313 FOR WIRING DIAGRAM.
71.3	ORIGINAL ENGINE HAD 3 PIN CONNECTOR WIRING HARNESS. SEE SERVICE MANUAL, INSTRUCTION SHEET E-313, AND OEM INFO FOR WIRING DIAGRAM, OR SUPPLY BY P/N.
72	ORIGINAL ENGINE HAD HIGH TEMPERATURE SWITCH; SUPPLY P/N 309-0559. SEE INSTRUCTION SHEET E-313 FOR WIRING DIAGRAM.
73	SUPPLY 541-0190 CHOKE KIT. NOTE: ON PERFORMER HORIZONTAL MODELS, 541-0190 KIT IS FRONT PULL CHOKE; ON PERFORMER VERTICAL MODELS, KIT IS REAR PULL CHOKE.
75	ORIGINAL ENGINE HAD DIODE IN WIRING HARNESS; SUPPLY 541-0436-01 (ALL PERFORMERS EXCEPT P224) OR 541-0436-02 (P224 ONLY) LOP SWITCH/HARNESS KIT.

Note No.	
76	ORIGINAL ENGINE HAD SPECIAL WIRING HARNESS; USE EXISTING HARNESS OR SUPPLY P/N'S 338-2575 AND 338-2640. REPLACEMENT ENGINE WILL HAVE CONNECTOR KIT 541-0195.
77	SUPPLY 541-0194 (USED WITHOUT LOW OIL PRESSURE SHUTDOWN) OR 541-0240 (USED W/ LOP SHUTDOWN) CONTROL PANEL KIT. PERFORMER CONTROL PANELS DON'T USE GAGES. NOTE: 541-0240 REQUIRES 2T/N.O. LOP SWITCH (REF: SALES CODE 35AV OR 35BV).
79	ALL POWER TAKEN OFF FRONT. WILL SUPPLY SPLINED CRANKSHAFT FOR "NO REAR PTO" AND SOME TAPERED REAR STUB CRANKSHAFTS.
80	REQUIRES 1" SPACER BENEATH OIL BASE FEET TO ALIGN CRANKSHAFT CENTERLINE.
80.1	USE CRANKSHAFT BALANCE WEIGHT FROM ORIGINAL ENGINE OR SUPPLY P/N 104-1156 OR 104-1712 AS REQUIRED. EXCEPTION: WEIGHT NO LONGER REQUIRED FOR B48G/TORO.
81	REQUIRES CONVERSION KIT FROM JOHN DEERE WHEN REPLACING KOHLER KT-17 ENGINE.
82	REPLACEMENT REQUIRES MILLER ELECTRIC KIT P/N 128623.
83	SUPPLY 541-0191 FRONT PULL GOVERNOR KIT.
84	SUPPLY 541-0239 7" PILOT ADAPTER KIT.
85	REQUIRES 541-0344 SAE "A" HYDRAULIC PUMP ADAPTOR KIT.
86	REQUIRES 541-0374 SAE "B" HYDRAULIC PUMP ADAPTOR KIT.
87	USE CLUTCH FLYWHEEL FROM ORIGINAL ENGINE OR SUPPLY P/N 104-0614.
88	SUPPLY 541-0405 EXHAUST TUBE KIT.
89	SUPPLY 541-0406 EXHAUST TUBE KIT.
90	SUPPLY 541-0370 THREADED EXHAUST FLANGE KIT.
91	EXHAUST SYSTEM ON ORIGINAL ENGINE WILL NOT FIT ON PERFORMER ENGINE. SEE F-734 <u>PERFORMER ENGINE OPTIONS &amp; KITS</u> .
92	OMIT CRANKSHAFT KEY ON REAR PTO STUB PER WELDER MANUFACTURER.
93	ORIGINAL ENGINE USED 309-0527 LOP SWITCH; SUPPLY BY P/N.
94	ORIGINAL ENGINE HAD 309-0329 HATKO SWITCH. NOT AVAILABLE ON PERFORMER.
95	REPLACEMENT ENGINE HAS DIFFERENT ENGINE MOUNTING BOLT HOLE DIAMETER & PATTERN. REQUIRES MODIFICATION. SEE <u>THE ONAN PERFORMER 24 REPLACEMENT ENGINE OUTLINE DRAWING, F-749. (NH)</u>
96	MIGHT REQUIRE CRANKSHAFT SPACER P/N 104-1681 IF MOUNTING ELECTRIC CLUTCH.
97	SUPPLY 541-0418 TWO SPEED GOVERNOR KIT.
98	REPLACEMENT REQUIRES TORO/WHEELHORSE KIT P/N 117295. (T260)
99	SEE APPENDIX E.1. (T260)
100	SUPPLY 541-0373 OUTER EXTENDED OIL FILL TUBE KIT.
101	SUPPLY 541-0296 STATIONARY GUARD KIT (WITHOUT PTO ACCESS HOLE).
102	SUPPLY 541-0369 STATIONARY GUARD KIT (WITH PTO ACCESS HOLE).
103	SUPPLY 541-0194 ENGINE CONTROL PANEL KIT (USED WITHOUT LOW OIL PRESSURE SHUTDOWN). PERFORMER CONTROL PANELS DON'T USE GAGES.
104	SUPPLY 541-0240 ENGINE CONTROL PANEL KIT (USED WITH LOW OIL PRESSURE SHUTDOWN). REQUIRES 2T/N.O. LOP SWITCH (REF: SALES CODE 35AV/35BV). PERFORMER CONTROL PANELS DON'T USE GAGES.
105	USE EXHAUST SYSTEM FROM ORIGINAL ENGINE OR SUPPLY 541-0377 (EXHAUST MANIFOLD-LEFT REAR OUTLET) AND/OR 541-0188 (EXHAUST HEAT SHIELD) KITS.
106	SUPPLY 541-0402 LP CARBURETOR KIT. REQUIRES WITHDRAWAL KIT.
107	ORIGINAL ENGINE MIGHT HAVE BEEN MODIFIED BY EQUIPMENT MFR. WITH LP ONLY OR DUAL FUEL (LP,GASO). SUPPLY KITS AS REQUIRED. SEE F-734 <u>PERFORMER ENGINE OPTIONS &amp; KITS</u> OR L-740 <u>PRICE LIST</u> .
108	ORIGINAL ENGINE HAD DUAL FUEL (LP, GASO) CARBURETOR. SUPPLY 541-0447 KIT IF REQUIRED.
109	SUPPLY PREMIUM SOLENOID SHIFT STARTER (SIDE SOL) P/N 191-1949-07.

Note No.	
110	USE SAE A HYDRAULIC PUMP ADAPTOR FROM ORIGINAL ENGINE OR SUPPLY 541-0344 KIT.
111	USE SAE B HYDRAULIC PUMP ADAPTOR FROM ORIGINAL ENGINE OR SUPPLY 541-0374 KIT.
112	SUPPLY 541-0411 STARTER CAP KIT.
113	REPLACEMENT REQUIRES E-Z-GO KIT P/N 27526-G01. (P220)
114	ORIGINAL ENGINE HAD SPECIAL 6 PIN CONNECTOR WIRING HARNESS. SUPPLY P/N 338-2216.
115	ORIGINAL ENGINE HAD SPECIAL 6 PIN CONNECTOR WIRING HARNESS. SUPPLY P/N 338-2843.
116	SUPPLY PREMIUM SOLENOID SHIFT STARTER (DOWN SOL) P/N 191-1949-05.
117	SUPPLY 541-0372 CHOKE KIT. NOTE: ON PERFORMER VERTICAL MODELS, KIT IS FRONT PULL CHOKE; ON PERFORMER HORIZONTAL MODELS, KIT IS REAR PULL CHOKE.
118	ORIGINAL ENGINE HAD SPECIAL 4 PIN CONNECTOR/3 WIRE WIRING HARNESS. SUPPLY P/N 338-2454-01.
119	SUPPLY 541-0445 LP CARBURETOR KIT. REQUIRES WITHDRAWAL KIT.

## Engine Identification - Model

A typical Model Number is made up of several sets of information. The following charts will assist in identifying Onan Industrial Engines (Air Cooled unless otherwise noted):

**Example:**    CCK    -    S    /    881    F  
                           1                           2           3           4           5

1. ENGINE FAMILY	NO. OF CYL.	CID	2. POWER TAKE-OFF/DESIGN FEATURE CODE
BF	2		F = Clutch Drive
BG	2		
CK	2		G = Gear Reduction Drive (2G = 2:1, 4G = 4:1, etc)
CCK	2		
CCKA	2		M = Electric Starter
CCKB	2		
CCKM <sup>a</sup>	2		MF = Electric Starter & Clutch Drive
RCCK <sup>b</sup>	2		
J60, JB	2	60	MG = Electric Starter & Gear Reduction Drive (2MG = 2:1, 4MG = 4:1, etc)
J120, JC	4	120	
JCM <sup>a</sup>	4		MS = Electric Starter & Stub Shaft
L25	1	25	MT = Electric Starter with Transmission (4MT = 3.9:1)
NB	1		
NH	2		S = Stub Shaft PTO (Manual Start)
NHA	2		
NHB	2		T = Transmission Drive - Clutch & Gear Transmission (2T = 2:1 or 2.5:1, 4T = 4:1)
NHBV <sup>c</sup>	2		
NHC	2		
NHCV <sup>c</sup>	2		
NHP <sup>d</sup>	2		V = Vacu-Flo Cooling

3. DIAGONAL LINE: Separates unit characteristics from specification number and letter.

4. SPECIFICATION NUMBER: Denotes customer requested deviations from the standard model.

5. SPECIFICATION LETTER: Denotes major change(s) in the unit series at the factory level.

<sup>a</sup> M = Military

<sup>b</sup> R = Liquid or Radiator Cooled

<sup>c</sup> V = Vacu-Flo Cooling

<sup>d</sup> P = LP Fueled

Example:  $\frac{\text{B}}{1} \frac{43}{2} \frac{\text{M}}{3} - \frac{\text{G}}{4} \frac{\text{A}}{5} \frac{016}{6} / \frac{3588}{8} \frac{\text{A}}{9}$

1. ENGINE SERIES: B, N, T
2. DISPLACEMENT: In cubic inches.
3. DUTY CYCLE: E = Basic medium duty, M = medium duty, G = higher duty cycle version.
4. FUEL: G = gasoline fueled.
5. COOLING: A = air cooled.
6. HORSEPOWER: 016 = 16 BHP, 018 = 18 BHP, etc.
7. DIAGONAL LINE: Separates unit characteristics from specification number and letter.
8. SPECIFICATION NUMBER: Denotes customer requested deviations from the standard model.
9. SPECIFICATION LETTER: Denotes major change(s) in the unit series at the factory level.

A derivative of the above format involves the T260G engine. It is similar except for the following:

- a. 2 = Two Cylinder

Example:  $\frac{\text{P}}{1} \frac{2}{2} \frac{16}{3} \frac{\text{G}}{4} - \frac{\text{I}}{5} / \frac{11251}{7} \frac{\text{D}}{8}$

1. ENGINE SERIES: P = Performer
2. NUMBER OF CYLINDERS: 2 = Two cylinder.
3. HORSEPOWER: 16 = 16 HP, 18 = 18 HP, etc.
4. CRANKSHAFT PLANE: G = Horizontal, V = Vertical.
5. FUEL: I = Gasoline fueled. (Note: Some early models may be gaseous), L = LP fueled, D = Dual fueled - gasoline/LP.
6. DIAGONAL LINE: Separates unit characteristics from specification number and letter.
7. SPECIFICATION NUMBER: Denotes customer requested features (standard or optional).
8. SPECIFICATION LETTER: Denotes major change(s) in the unit series at the factory level.

## Engine Mounting Comparison Data

Engine	A Crankshaft C/L Ht (in)	W x L Bolt Hole Pattern (in)	Figure
CCK-MS	8.65	12.25 x 7	1
CCK-S (Manual Start)	6.83	12.25 x 7	1
N Series	8.65	12.25 x 7	1
RCCK	8.65	12.25 x 7	1
B Series (Std)	6.59	7.25 x 8.94	2
B Series (Opt, Miller)	7.48	7.25 x 8.94	2
N52M	6.59	7.25 x 8.94	2
P Series (Std, exc P224)	6.59	7.25 x 8.94	2
P Series (Opt, P224)	8.65	7.25 x 8.94	2
T260	7.50	7.25 x 8.94	2

Figure 1

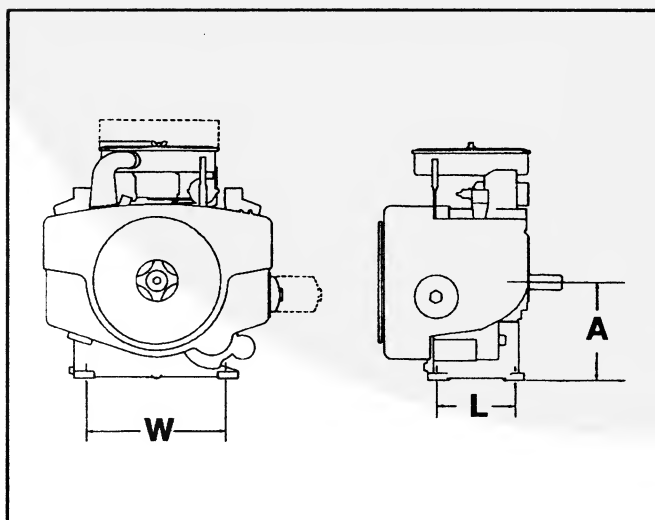

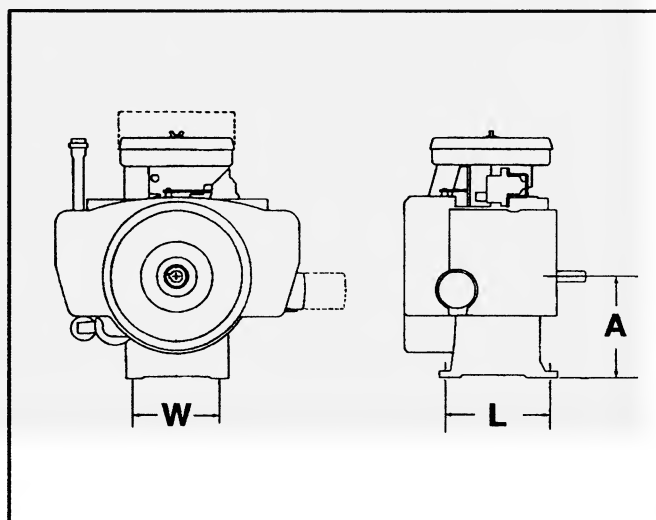

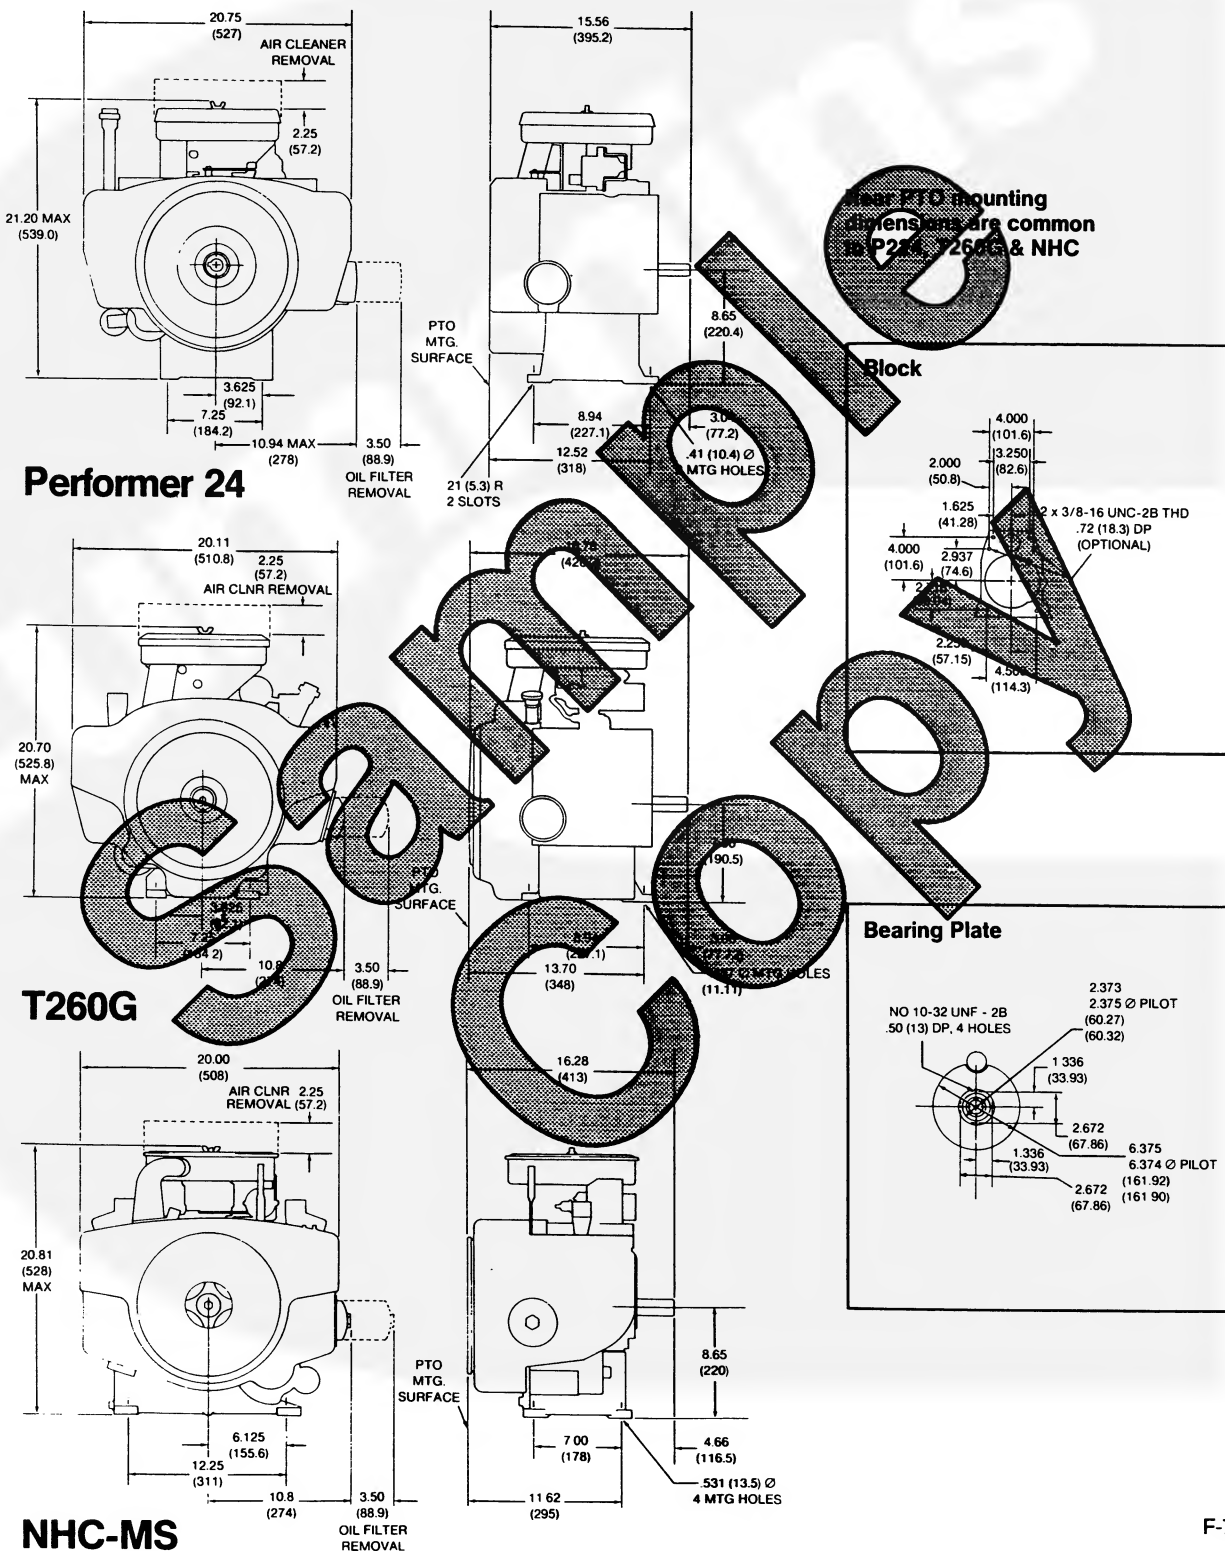

Figure 2

# The Onan Performer 24 Replacement Engine For the NHC-MS and T260G Engines

F-749

## **Appendix E.1 Replacing T260G With Performer P224G.**

When considering the P224G as a replacement for the T260G, the major compatibility issues are: 1) the difference in crankshaft centerline height (distance from the center of the crankshaft to the engine mounting base surface), and 2) if the six (6) hole block is required. The six (6) hole block feature is available only as a factory equipped option. On some T260G models the six (6) hole block was standard equipment and as such might not have been required for a particular application. The four (4) hole block is standard equipment on all base and stock Performer models. Note: The Onan hydraulic pump adapters (Ref: Sales Codes 11BE and 11BF) use the standard four (4) block; the six (6) hole block is not required.

Other important considerations include access to service locations, particularly the oil fill tube and indicator, exhaust system compatibility, if power is taken off the blower wheel end (PTO spacer kit required), and other functional requirements of the original engine.

See Appendix D and F-749 The Onan Performer 24 Replacement Engine outline drawing.

### **Starter**

An inertia drive starter was used on the T260G: first as standard equipment and then as an option when the solenoid shift starter became standard beginning Spec G. A solenoid shift starter (side solenoid) is standard on the Performer. This should not be a problem regarding fit-up within the engine compartment except possibly in tight quarters applications; a solenoid shift starter with down solenoid or an inertia drive starter is available for the P224G if necessary. Note: T260G and Performer starters are not interchangeable.

### **Simon Aerial, Genie - Aerial Manlift Applications**

The factory equipped engine might have been modified for or by the OEM with one or more of the following options: 1) two (2) speed solenoid actuated governor, 2) remote solenoid actuated choke, and 3) dual (gasoline, LP) or straight LP fuel system. LP withdrawal hardware was typically mounted on cylinder No. 2 (RH) side. These options are available as Onan kits; supply as required. Parts from the original T260 engine should not be reused.

## **Appendix E.2 Replacing NH With Performer P224G**

### **Flywheel/Blower Wheel**

Some early NH applications used a blower wheel machined for front PTO with a 1.94" pilot diameter and 3/8-16 tapped holes on a 2.62" diameter bolt circle when power was taken off the front (e.g. Owatonna). The Performer blower wheel has a 2.00" pilot dia. with 5/16-18 tapped holes on a 2.75" dia. bolt circle. This is not a problem if the original engine did not take power from the blower wheel end of the engine. For old units that bolted a PTO shaft (or similar arrangement) to the blower wheel, the original shaft must be modified and adapted or a new shaft used. One possible alternative is to use the 190-0577 PTO shaft (1.44" dia) kit and adapt the shaft to fit the application. A kit is available if a stationary guard is required.
